ABSTRACT

Extensive statistical data summarizes the characteristics and academic progress of transfer students from the Florida community colleges to the state university system in 1974, 1975 and 1976. Summary data are presented by sex, race, age, and university; date of entry, credits earned prior to entry; college of origin, and grade point average (GPA). Also included are cumulative GPAs for transfer students by credit hours transferred and community college origin, and data on majors according to university attended and year of transfer. Highlights of the study include a continual increase of transfers over the three year period, with the number of female, black, and Hispanic transfers increasing. Most students transfer to the university nearest their home after completing 90 quarter (60 semester) hours. The majority earn a GPA of 2.00 or better, and finish upper division study or otherwise withdraw in two years. Data tables present trends in comparative and summary form. (RT)

INTRODUCTION

A major function of Florida's community colleges is to provide curricula through which students may prepare themselves for entry into the universities' upper division instructional programs. Consequently, the community colleges and the Division of Community Colleges are concerned about the academic progress of those students transferring to the state universities of Florida.

The Articulation Agreement of 1971 between the Division of Community Colleges and the Division of Universities provides for the encouragement of research conducted cooperatively by the two divisions. Articulation reports have been published by the Division of Community Colleges since 1973. These reports utilize data on former Florida community college students who were in the State's universities as far back as 1971. In 1974, the State University System (SUS) established the Student Data Course File which contains a rather complete record of all students enrolled in the universities. Since that time a stable data format has been maintained enabling one to compare groups of students over time. For this reason, this report includes data for the Fall term for three consecutive years, 1974, 1975, and 1976.

The reader will typically be interested in comparing a specific sub-group of students over time - those from a given community college, those at a given university, those in a particular major, etc. It is virtually impossible to note all possible trends of interest found in the following tables. However, the information is there for the reader to search out. Because of the volume of data presented, only brief comments will be made concerning the tables and concentration will be on the totals.

Each table will contain summary statistics on lower division students in the nine state universities - Florida Agriculture and Mechanical University (FAMU), Florida Atlantic University (FAU), Florida International University (FIU), The Florida State University (FSU), Florida Technological University (FTU), The University of Florida (UF), The University of North Florida (UNF), the University of South Florida (USF), and The University of West Florida (UWF) - who prior to enrolling in the SUS were students at one of Florida's 28 community colleges (see inside back cover). Most tables will include students enrolled in the Fall term in 1974, 1975, and 1976. For various reasons, data are sometimes missing for FAMU and FIU.

Table 1 presents the frequencies of undergraduate students, at the state universities of Florida, whose college of last attendance was a Florida community college. The table indicates that the total number of transfer students has increased each year from 1974 through 1976. The same is true at each university with exceptions at UF and UNF between 1975 and 1976 although their percentages remained relatively unchanged. Males outnumbered females except at FAMU in 1974 and 1975 although the percent of females in the SUS has increased steadily.

Table 2 indicates that the racial distribution for transfers in the SUS has remained relatively stable except that the percents of Blacks and Hispanics have steadily increased and the percent of Whites has steadily decreased slightly. This pattern holds at all universities except FAMU where the percent of Whites has increased and Blacks decreased, FTU where Blacks and Whites decreased, and at UNF where the percent of Hispanics slightly decreased in 1976.

Table 3 shows that the mean age of transfer students has increased by one year over the three-year period. It is noticeable that highest mean ages are

at the newer universities which are also upper division universities. The percentage of transfers age 30 and under dropped from 87.8 to 86.9 between 1974 and 1975 but jumped to 88.4 in 1974. The percentage of transfers over age 30 rose slightly from 12.2 to 13.1 from 1974 to 1975 but dropped to 11.6 in 1976. The percentage of over 30-year olds is considerably higher at UNF than at other universities.

Table 4 indicates that the greatest percentage of students were in their first year of study in each of the three years. This percentage averaged 52.2 in 1974 and gradually dropped to 44.9 in 1976. The second largest group, 32.6% to 33.4%, had been in the SUS up to two years. Percentages of transfers who have been in the SUS longer drop off substantially each year indicating that students tend to complete their program or otherwise leave after two to three years. It should be noted that prior investigation of these data shows that the majority of students enter the SUS in the Fall quarter.

Table 5 reports the number of quarter hours transferred by the students into the universities. Data were missing for FAMU for 1974 and 1975 and data for FAU, FIU, UNF, and UWF are questionable. Students have been reported transferring less than 90 quarter hours when in fact these universities are upper division institutions. The table shows clearly that the largest group of students each year transferred after earning 90 quarter hours (60 semester hours) at the community college. Although there are no apparent trends, the percent never dropped below 50.3 except at FAMU in 1976 and goes as high as 89.3 at FIU, also in 1976. Since the Associate of Arts degree requires at least 90 quarter hours, this would indicate that the students are probably utilizing the community colleges extensively to complete lower division work before moving on.

Table 6 shows the number of hours earned toward a degree at both the

community college and the university. For the information in Table 6 to be more meaningful, one needs to know the amount of time spent in accumulating these hours toward graduation. A relatively small percentage (3.5 to 3.9) of students in the SUS have accumulated more than 180-194 quarter hours, the number typically required for a baccalaureate degree.

Percentages in Table 7 and 8 remain fairly stable over the three-year period. Upon close inspection, the reader will note that most students will transfer to the university nearest their community college. Table 7 reports column percents, orienting this table toward universities and Table 8 reports row percents, orienting this table toward community colleges. No particular trends are noted over the three-year period.

Table 9 clearly shows that most transfer students (86.7% to 90.3%) earn a GPA of 2.00 or higher in the SUS and the percent has increased steadily. GPA in the SUS is based on a 4.0 system and is calculated by dividing grade points earned by credit hours attempted. It was assumed that many GPA's equal to zero represented erroneous or missing data so these were grouped separately.

Table 10 enables the reader to compare two groups of Fall 1976 transfer students - those who transferred before earning 90 quarter (60 semester) hours at the community college and those who transferred after earning 90 quarter hours. Since the table is lengthy, 1974 and 1975 data are not shown for individual universities. However, these are available in prior editions of Articulation. Enough information is given for one to compare any two groups of interest. By and large, the GPA earned at the university is higher for those who transferred after earning 90 quarter hours, the usual requirement for the AA degree. GPA's reported are means of individual GPA's. In all tables reporting GPA, zero or missing cases were excluded.

Table 11 presents the same type of data as Table 10. Here are shown SUS totals for 1974, 1975, and 1976. GPA for each group has increased steadily and standard deviation (S.E.) has decreased steadily indicating that the individual GPA's are concentrated more toward the mean GPA. For each of the years, the group transferring after earning 90 quarter hours earned a higher mean GPA than did the group transferring prior to earning 90 quarter hours. Note, however, that the GPA difference has decreased from .24 to .10 to .09 over the three-year period. The information indicates that an increasingly larger proportion of community college students are earning 90 hours or more prior to transferring. In 1974, 71.7% of the students had 90 or more hours, while in 1976, 75.9% had earned 90 or more hours.

Table 12 presents the mean GPA earned at the university for all students found in Table 10. Again, data for 1974 and 1975 were omitted because the table is lengthy.

Table 13 reports SUS total mean GPA's for transfer students from each community college for the years 1974, 1975, and 1976. Again, it is quite noticeable that the total mean GPA has steadily increased while the S.E. has decreased.

Table 14 shows the number registered in each major area by university. Each of these groups is divided into two subgroups - those whose GPA is 2.00 or higher and those whose GPA is below 2.00. Mean GPA for the major is reported in the final column. As with Table 10 and Table 12, data are presented for Fall 1976 only.

Table 15 presents data similar to Table 14, but allows one to make comparisons in the SUS for the years 1974, 1975, and 1976. Note that the percent whose GPA is 2.00 or higher has risen steadily from 86.7 to 88.3 to 90.4. This is not surprising since the mean GPA for each major has risen over these years.
